

DBG Software

Real Performance...It's About Time

A Recent Testimonial:

"Even though we have BMC tools in place, we have been using DB-Genie for many years both on a daily basis and for strategic activities like disaster recovery testing. There is no other product we've seen that is so powerful, yet so simple to use. It's nice to see a company has written a product that is straightforward."

Donna Andreassen, Manager DBA Services, Verizon

Everyday DBA Issues

Where Does All Your Time Go?

DBA's have tons of responsibility and no time

So Many DB2 Objects

Big DB2 databases make utility strategies a burden

Current Toolset Isn't Helping Enough

Utility generation is often a by-product

Utility Strategies Run Too Long

Excessive taxing of operational resources

Training Doesn't Help Much

Too many esoteric concepts to learn

Am I Justifying My Worth?

DBA's have the most visibly accountable position in IT

The Solution: DB-Genie™

Optimize Day-to-Day Tasks

Countless every day tasks streamlined

Large DB2 environment? No Problem!

Manage utilities in any size DB2 database with ease

All DB-Genie Functionality Is Needed

Finally, a product created by DBA's for DBA's

Optimize Operational Environment

Have jobs finish in parallel with our unique integration of Load Balancing & List Processing

Easy To Learn

No training needed, very easy to use screens

DBA Value Skyrockets

Optimize DBA investment. Leverage their time wisely with DB-Genie
